

## Panel Discussion ‘Sustainable management of anthropogenic resources’

Conference on Mining the European Anthroposphere, 20-21 Feb. 2020, Bologna, Italy

### Laurence LAMM

**Dr. Laurence Lamm** holds a PhD in Material Science from the University Metz, an Engineer degree in Metallurgy from the Conservatoire National des Arts et Metiers and a Master degree on Management of Safety, Quality and Environment from CESI.

Mrs. Lamm started her professional career in Steel sector in 1983 as a researcher in different departments. She lived 6 years in USA (she was a teacher of physics and chemistry and then worked for Detroit Diesel).

She joined back the steel making industry when back in France as a manager of projects and innovation. She spent 10 years at the Corporate University of the steel maker to lead the Steel Academy, the Mining Academy and later create the Maintenance and Risk academy as well as the H&S Academy. Her last mission at the CTO department was to organize technical events and manage several projects of Knowledge Management.

She joined EIT RawMaterials in Sept 2016 as Senior Advisor for Processing: she is responsible of the coordination of the Processing and Recycling activities and participates in several Advisory Boards.

For the education side, she is involved in the improvement of the Life Long Learning projects. She organized a roadshow to meet industrial partners to seek their training needs. She has also developed and rolled out a skill assessment methodology. She participates in some Erasmus+ project on Blueprint for sectorial skills.
