

Panel Discussion ‘Sustainable management of anthropogenic resources’

Conference on Mining the European Anthroposphere, 20-21 Feb. 2020, Bologna, Italy

Lighea SPEZIALE

Lighea SPEZIALE holds a master’s degree in environmental engineering and works since 2012 in CEWEP, the confederation of European waste-to-energy plants, where she covers all technical dossiers. Her areas of expertise are emissions to air and water, monitoring techniques, life-cycle analysis, waste management systems and in general waste-related law.

She has an extensive knowledge of waste legislation, that she is able to combine with her technical background in order to properly communicate and interact with policy makers, public entities, other European associations and general public. During the last years her main focus was the review of the Waste Incineration BAT Reference document (BREF), where she coordinated internally the work of more than 30 people and produced content for external policy exchange.

She is also working on the European Commission’s Interface between chemical, product and waste Legislation, the evaluation (and in case, the review) of the Industrial Emissions Directive (IED), POP regulation, POPRC under the Stockholm convention, Plastic and Household Waste Partnership in the Basel convention.
